

Student Action Plan

School:

Team Members:

Why is it important for leaders to be youth?

What do you plan on doing? (Engineering innovation, education, policy, lifestyle, fundraising, local action...?)

Why are you doing this?

Who will it impact? (Your school, your community, Alberta, Canada, the world...?)

Which other *Sustainable Development Goal(s)* does your project relate to?

How will your project impact the other *Sustainable Development Goal(s)*?

What challenges do you think your project will encounter? (Money, awareness, scale, volunteers...?)

How can you promote your project and get others involved? (Posters, talks, social media...?)

Who would be best at mentoring you? (Other students, teachers, SOS mentors, school board, the mayor, NGO's...?)

How can they help?

How will you make your project happen?

What you'll do (step by step, be realistic!).	Who will do it?	When will you do it by?

Make your action plan a reality or get recognized for your great work at:
